WORK EXPERIENCE

Junior Web Developer
techbees.io
June 2022 - March 2023

- Key member of a team working on a commercial React.js project for corazzdrowiej.pl, with responsibilities that included creating and testing frontend functionalities.
- Took part in developing a custom tool for creating and managing a Wordpress site to meet specific client needs, which involved the creation of new features and page templates (franciszkanie.pl).
- Collaborated with design and backend teams to create high-quality products, participated in daily meetings and Agile retrospectives.
- Recognized for problem-solving abilities, technical requirement analysis, and the implementation of innovative solutions that enhanced system performance.

Web Developer / Digital Media Specialist
Massive Pixel Creation
February 2021 - May 2023

- Developed and customized websites in a proprietary CMS. I used my programming knowledge and web design skills to create unique features beyond the platform's defaults.
- Applied Agile and Scrum methodologies for effective project management, regularly using Jira for work organization and progress tracking.
- Managed relationships with international clients from the United States, conducting regular remote meetings and maintaining contact through email and Slack.
- Honored with "The Best Service Delivery of Q2 2021" at the MPC Awards.
- Implemented SEO practices including keyword analysis, meta tag optimization, and SEO-focused content creation. Regularly monitored and adjusted SEO strategies to optimize site ranking.
- Created engaging graphics and content for social media channels to enhance brand presence and drive website traffic.
